

Kumusta!

Hello! We are glad you are here.

Know a great home? Help a host take the next step.

[YOUR FILHOME REFERRER HANDBOOK](#)

Property referrals, explained clearly

Good introductions can help more suitable properties find their way onto Filhome. Your referral dashboard keeps your link, activity and reward progress together, so you can see what happens after you share.

01**Join and verify**

Create your account and confirm your email.

02**Introduce a new host**

Share your personal link before they register.

03**Track the property**

Follow eligibility, rewards and withdrawal progress.

A useful introduction starts with context

Think of a property owner who has not already joined Filhome. Explain why the platform may suit their property and let them decide whether to register. Share your own referral link so their new host account can be attributed correctly.

A few clear steps. A more confident start.

1

Set up your referral account

Sign up with your name, email and password, then confirm your email. Open the referral dashboard to find your personal link. Keep your sign-in details private and check that you are sharing the correct link.

2

Share with a new property owner

Ask the host to use your link when they first register. Existing host accounts and self-referrals do not qualify. Share thoughtfully with people who may find it useful; give them space to ask questions or decline.

3

Watch the property reach eligibility

By default, a qualifying property earns PHP 50 after an approved inspection and publication with current verification. Admins can also require a first paid booking. The reward rate and rule are fixed when the referred host joins. Each property earns once.

GOOD TO KNOW

Rewards are for eligible properties, not student signups, link views or a host account alone. Avoid promising an instant or guaranteed payout.

From introductions to a withdrawal

The default withdrawal minimum is PHP 150. At a PHP 50 reward, three qualifying properties reach that minimum. Three link clicks or three student signups do not. The dashboard separates activity from rewards so you can follow the actual progress.

Illustrative example: 3 eligible properties x PHP 50 = PHP 150. Settings can change; use the applicable reward terms and your available dashboard balance.

You have got this.

Here are the details people often want to check before moving on.

A host signed up. Why is there no reward yet?

The property still needs to qualify. A host signup records the introduction but does not itself earn a reward. Check the progress in your dashboard.

How do I request my money?

Verify your email, reach the minimum available balance and enter the requested payout details. Check the account name and number carefully before submitting. Admin reviews withdrawal requests.

What can I track?

Your dashboard shows link visits, referred host progress, rewarded properties, available balance and withdrawal activity. Previously earned balances remain separate from the new property reward history.

Before you share or withdraw

- ☐ Copy your personal link from your dashboard.
- ☐ Explain property eligibility without promising approval.
- ☐ Check your verified email and available balance.
- ☐ Review payout details before requesting a withdrawal.

Share a useful opportunity.

One thoughtful introduction is more valuable than a promise you cannot make. Let the property and the process do the rest.
